

Our responsibility

To promote environmentally friendly restructuring of energy consumption and energy production in order to reinforce supply reliability and reduce greenhouse gas emissions.

The energy restructuring is a long-term commitment to developing markets for efficient and environmentally friendly energy solutions.

 enova

Our vision

The driving force for future energy solutions

Our values

- Clear
- Responsible
- Inspiring
- Market-oriented

 enova

Our main objectives are

- more efficient energy consumption
- increased use of other energy carriers than electricity, natural gas and oil for heating
- increased production from renewable energy sources
- introduction and development of new technologies and solutions in the energy market
- Functional markets for efficient and environmental friendly energy solutions
- More general awareness of the possibilities for using efficient, environmentally friendly energy solutions

Our performance measures

- Overreaching targets for energy conservation and renewable energy production
 - 18 TWh in 2011
 - 40 TWh in 2040
- Stationary use of energy in 2009:
 - 153 TWh total
 - 105 TWh electricity

Funding

- Enova draws on The Energy Fund to finance its activity and measures.
- The Energy Fund is financed by:
 - The return on a fund in the national bank (20 bn NOK)
 - A levy on the transmission tariff (0.01 NOK/kWh)
 - Over the annual state budget
- 2 billion NOK/year (250 million €/year)
- Administration costs are less than 5% of disposable means

Strategic priorities towards 2013

- Building for the future
- Trigger the substantial potential for renewable energy
- Competitive renewable heating
- Energy efficiency as competitive advantage

Markets

- Energy end use in buildings
 - Public buildings
 - Commercial buildings
 - Residential buildings and energy end use in households
- Energy production
 - Renewable power
 - Renewable heat
 - Industrial energy end use
 - New technology
